

AMCS fleet maintenance

Learn how our solutions reduce costs, improve productivity, and advance Performance Sustainability

Book a call with our experts today for a personalized consultation ➤

The complete management of fleet and related assets, delivering increased productivity, stronger compliance, and better safety, while lowering costs.

Overview

AMCS Fleet Maintenance is the world-class, built-for-industry solution that manages equipment, employees, shops, and resources in real time — unlocking value and productivity, while powering sustainability that increases profitability.

This is a modern tool designed for the work processes in your business. The intuitive UX digitizes your business operations, making all shop functions available either via the web or a mobile device. The solution helps your technicians capture data, while guiding them through your standard procedures. And, it moves your organization toward Performance Sustainability – our term for the ability to prioritize people and the planet, while always remaining focused on profitability.

With AMCS Fleet Maintenance, you can save up to 4x of preventative maintenance costs.

AMCS Fleet Maintenance gives you peace of mind that your fleet is safe and compliant. The solution manages all prescribed preventive asset maintenance, and features management compliance dashboards that handle all regulatory requirements, inspections, and certifications.

Feature highlights

- Management of all Preventive Maintenance tasks (PMs). PMs can be scheduled on distance run, hours operated, time (days), fuel consumed, business metrics, or any combination of these that's useful to you.
- Dashboards and cards visualize the status of assets, people, parts, work orders, procurement, and more. Analytics deliver insightful history and trends, providing one of the solution's key benefits: support for better decisions.
- Automatically capture time and scan parts on to Work Orders that eliminate costly and error-prone double data entry. Standard Repair processes interactively guide technicians through work tasks and create benchmarks.
- Highly configurable to support any type of asset and organizational structure.
- Complete capture and analysis of all internal and external maintenance and operations costs, as well as allocated and overhead costs.
- Optimized for Finance – data and analysis in both maintenance and General Ledger (GL) formats.
- Work potentially covered by warranty is automatically flagged at the time of repair. Claims are automatically created, managed, and reconciled.
- True SaaS implementation allows access anywhere via browser and mobile devices.
- Standard integration with AMCS Enterprise Management software – AMCS Platform. Strong capabilities for integration with other third-party systems.
